ABSTRACT

DRUM TYPE WASHING MACHINE

5 A drum type washing machine includes housing 15,
rotary drum 13, water tub 16 accommodating rotary drum 13
therein, door 20 for opening and closing housing opening 15b
for allowing laundry to be loaded into or unloaded from
rotary drum 13 therethrough, water tub opening 16c
10 communicating with housing opening 15b, rotary drum opening
13a communicating with housing opening 15b and water tub
opening 16c; and elastic connection member 22 for connecting
housing opening 15b and water tub opening 16c, and having a
portion that makes a pressurized contact with door 20 when
15 door 20 is closed. A center of housing opening 15b is
displaced upward with respect to a center of rotary drum
opening 13a, and an angle θ_2 of inclination of housing
opening 15b with respect to a vertical plane V2 is set to be
greater than that of rotary drum opening 13a with respect to
20 a vertical plane V1.
