(54) Title: SYSTEM AND METHOD FOR GENERATING AND PROPAGATING BUSINESS EVENTS

(57) Abstract: A method for propagating a business event is provided. The method includes defining an event, registering a source for the event and registering a component interested in the event. The method also includes defining a data channel to be used for a notification of the event. The event is identified and the notification of the event is transmitted to the interested component via the data channel. A system for implementing the method is also provided.
