

ABSTRACT

Provided in the present disclosure are a character processing method and apparatus, and a computer device and a storage medium. The character processing method comprises : acquiring a target character, and determining font information corresponding to the target character; according to the font information, generating a character image corresponding to the target character; and determining a mask image corresponding to the target character in the character image, inputting into a stylization model the mask image and style prompt information corresponding to the target character, and determining a stylized character image corresponding to the target character. By means of the method, the speed and quality of character stylization processing can be improved.
