(54) Title: METHOD FOR PERFORMING A SIDELINK POSITIONING/RANGING PROCEDURE IN A COMMUNICATION
SYSTEM AND A NETWORK SYSTEM

100

FIG. 3

(57) Abstract: The present invention relates to a method for performing a sidelink positioning procedure and/or a ranging procedure in a communication system, wherein the communication system comprises a network system (20), a first User Equipment (UE1) and a second User Equipment (UE2), and wherein the network system (20) comprises a network function (NF), a unified data management function (UDM) and an access and mobility management function (AMF), the method comprising the following steps: - registering (110), by UE1 and UE2, with the network system (20); - sending (120), by the NF, a data retrieval request to the UDM; - receiving (130), by the NF, the privacy profile data from the UDM; - evaluating (140), by the NF, the privacy profile data of the UE1 and UE2; - performing (150) the sidelink positioning procedure and/or the ranging procedure in case the preceding evaluation has resulted in the presence of user consent to share location information.
