8. The touch panel according to any one of claims 1 to 7,
wherein in the place where the first conductive film and the line overlap, the first conductive film has a width wider than that of the line.

9. The touch panel according to any one of claims 1 to 8,
the first conductive film is formed so as to overlap an entirety of the line when viewed in a plan view.

10. A display device with touch panel comprising:
a liquid crystal display device; and
the touch panel according to any one of claims 1 to 9.

11. The display device with touch panel according to claim 10,
wherein the liquid crystal display device includes a thin film transistor containing indium zinc gallium oxide.

8. The touch panel according to any one of claims 1 to 7,
wherein in the place where the first conductive film and the line overlap, the first conductive film has a width wider than that of the line.

9. The touch panel according to any one of claims 1 to 8,
the first conductive film is formed so as to overlap an entirety of the line when viewed in a plan view.

10. A display device with touch panel comprising:
a liquid crystal display device; and
the touch panel according to any one of claims 1 to 9.
