(54) Title: SYSTEMS AND METHODS FOR DETERMINING GUI INTERACTION INFORMATION FOR AN END USER DEVICE

FIG. 4

(57) Abstract: A computer implemented method for determining graphical user interface, GUI, interaction information for an end user device is described. The method comprising analysing device state information using one or more GUI spying modes to estimate GUI interaction information for the one or more GUI spying modes; classifying the estimated GUI interaction information for the one or more GUI spying modes based on a reference model; and outputting GUI interaction information based on the classification results.
