

ABSTRACT OF THE INVENTION

PELLET FORM CATHODE FOR USE IN A BIOCOMPATIBLE BATTERY

Methods and apparatus to form biocompatible energization elements are described. In some examples, the methods and apparatus to form the biocompatible energization elements involve forming pellets comprising active cathode chemistry. The active elements of the cathode and anode are sealed with a biocompatible material. In some examples, a field of use for the methods and apparatus may include any biocompatible device or product that requires energization elements.
