ABSTRACT

DOCUMENT SORTING METHOD, DEVICE, SYSTEM AND COMPUTER-READABLE STORAGE MEDIUM

A document sorting method, a document sorting device, a document sorting system and a computer-readable storage medium, are disclosed. The document sorting method, includes generating a parking instruction according to box information of a plurality of document storage boxes, wherein the parking instruction is configured to indicate a feeding area; determining document information of at least one document of a delivery device and acquiring feature information according to the document information, when receiving an signal indicating that the delivery device is parked at the feeding area; and determining one document storage box as a target box according to the feature information and a plurality of pieces of the box information, and generating a corresponding document storage instruction according to the target box. The document sorting method in this disclosure effectively improves efficiency of document sorting and classification.
