(54) Title: DISINSECTION DEVICE

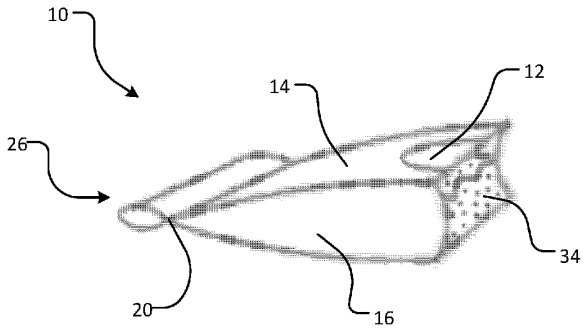

Fig. 3

(57) Abstract: A disinsection device for disinsection of an interior space such as an aircraft unit load device, comprising: a reservoir comprising an active ingredient; a sachet comprising a mixture configured to facilitate heat activation of the active ingredient upon exposure of the sachet to air; and a receptacle in which the sachet is disposed, wherein: the receptacle is initially in a first configuration in which the receptacle forms a substantially airtight compartment around the sachet to prevent activation of the active ingredient, and is transitionable to a second configuration to expose the sachet to air to cause activation of the active ingredient.
