(81) Designated States (*unless otherwise indicated, for every kind of national protection available*): AE, AG, AL, AM, AO, AT, AU, AZ, BA, BB, BG, BH, BN, BR, BW, BY, BZ, CA, CH, CL, CN, CO, CR, CU, CZ, DE, DJ, DK, DM, DO, DZ, EC, EE, EG, ES, FI, GB, GD, GE, GH, GM, GT, HN, HR, HU, ID, IL, IN, IR, IS, IT, JO, JP, KE, KG, KH, KN,

(54) Title: CHILD SAFETY SEAT AND SIDE COLLISION PROTECTION MECHANISM THEREOF

FIG. 1

(57) Abstract: A side collision protection mechanism (10) includes a side collision protection case (11) pivotally connected to a side region (21) of a child safety seat (100) and a locking element (12) movably set in the side collision protection case (11) and having a locking end (121) detachably locked to the side region (21). The locking end (121) is fully locked to the side region (21) when the side collision protection case (11) is in an extended state and subjected to a side impact force, or partially locked to the side region (21) when the side collision protection case (11) is in the extended state but not subjected to any side impact force. The side collision protection case (11) can be pushed pivotally relative to the side region (21) to switch from the extended state to a folded state and to release the locking end (121) from its locking to the side region (21). A child safety seat (100) with the above side collision protection mechanism (10) is also disclosed.
