

ABSTRACT

The present invention provides a grease composition comprising: a lubricating base oil; and a thickener, wherein the lubricating base oil comprises a first lubricating base oil having a %C_A of 2 to 8 and a %C_P of 50 to 75, the %C_A and the %C_P being values determined by n-d-M ring analysis according to ASTM D3238, and a second lubricating base oil having a %C_A of 1 or less, a %C_P of 70 or more, and a urea adduct value of 4% by mass or less, the %C_A and the %C_P being values determined by n-d-M ring analysis according to ASTM D3238, and wherein a content of the first lubricating base oil is 5 to 90% by mass and a content of the second lubricating base oil is 10 to 95% by mass, based on a total amount of the lubricating base oil.
