(54) Title: MANAGEMENT OF THE FLOW OF PASSENGERS, BAGGAGE AND CARGO IN RELATION TO TRAVEL FACILITIES

(57) Abstract: Procesing passegers for depature from an airport comprises a first line for passengers to be processed through a control point on the basis of first-in first-out. There is a second line for passengers to be processed on a non first-in first-out basis. The availability for the second line is determined by at least one of the following characteristics, namely the status of the passenger realtive to an airline class of service ; delays in flight times of one or more flights using the airport ; cancellations of other flights using the airport ; security factors at the airport ; staffing at the airport ; calendar date of flight ; time of date of flight ; number of passemgers for the flights ; and baggage handling. The system also processes passengers for arrival at an airport. The system also processes passengers for arrival at an airport so as facilitate baggage handling.
