(54) Title: SOURCE DISPENSING UNIT FOR A NEEDLE ASSEMBLAGE

FIG. 1A

(57) Abstract: Apparatus for control of a needle assemblage (10) having a handle (14) coupled to a hollow needle (30) and a stylet (36) penetrating the hollow needle. The apparatus includes a retaining bar (18) and a connector (22) slidingly mounted on the retaining bar that is configured to fixedly attach to the handle. The connector has a control (110) which in a first position causes translation of the connector proximally on the retaining bar by a preset distance to translate the handle and the hollow needle proximally by the preset distance and to translate the stylet distally by the preset distance with respect to the connector. In a second position the control causes translation of the connector on the retaining bar by the preset distance to translate the handle, the hollow needle, and the stylet by the preset distance.
