

PREFABRICATED DOUBLE-SKIN WALL MOLD

ABSTRACT

5 Disclosed herewith is a mold for manufacturing a prefabricated double-skin wall including a lower wall body (10) and an upper wall body (20). The mold comprises a platform (1), a lower side plate assembly surrounding an outer periphery of the lower wall body (10), an upper side plate assembly surrounding an outer periphery of the upper wall body (20), and a horizontal supporting mechanism for supporting the upper
10 wall body (20). The lower side plate assembly is detachably mounted on the top of the platform (1), and at least a part of the upper side plate assembly is detachably mounted on the top of the platform (1) or the lower side plate assembly. The horizontal supporting mechanism is arranged between two opposite upper side plates of the upper side plate assembly.
