

Abstract

Embodiments of the invention provide a system and method for obtaining buddy feeds. The method includes: receiving a request for viewing buddy feeds from a user; obtaining update flag information of a buddy; obtaining data from a feeds data block of the buddy, according to the update flag information of the buddy; and returning the data in the feeds data block of the buddy to the user. By adopting the system and method for obtaining the buddy feeds provided by embodiments of the invention, time consumed by a user when viewing buddy feeds may be reduced. And the latest feeds information of a buddy may be obtained in real time.
