Abstract

MATTRESS WITH ADJUSTABLE HARDNESS AND COMFORT LEVELS

A mattress with adjustable hardness and comfort levels including the surface cover layer, first comfort layer, second comfort layer and hollow space made of foam at the bottom. This mattress also provides the flexibility for consumers to change the first and second comfort layers in the mattress to achieve the most appropriate hardness level according to his body profile independently for the users on the left and right sides of the mattress. Thus the consumers may change the hardness and comfort levels of their mattress easily by changing the comfort layers according to their desires anytime.
