

**HANDHELD ELECTRONIC DEVICE HAVING IMPROVED PHONE
CALL LOG, AND ASSOCIATED METHOD**

ABSTRACT

An improved handheld electronic device and an associated method provide an improved call log that presents information relating to logged phone calls in a collapsed manner, meaning that for each phone number having a call stored in the memory of the device, only the most recent in time call is listed on the call log. An improved handheld electronic device and an associated method also provide a call history for any phone call from the improved call log that is selected by the user. The call history includes a listing of all of the calls stored by the device that are associated with the selected call log call.
