

ABSTRACT

SECURE CHANNEL ESTABLISHING METHOD AND APPARATUS, AND RELATED DEVICE AND STORAGE MEDIUM

Disclosed in the present application are a secure channel establishing method and apparatus, and an MSGin5G UE, an MSGin5G server and a storage medium. The method comprises: an MSGin5G UE generating a first key on the basis of an authentication and key management for application (AKMA) service; and on the basis of the first key, establishing a secure channel between the MSGin5G UE and an MSGin5G server.
