FIG. 3

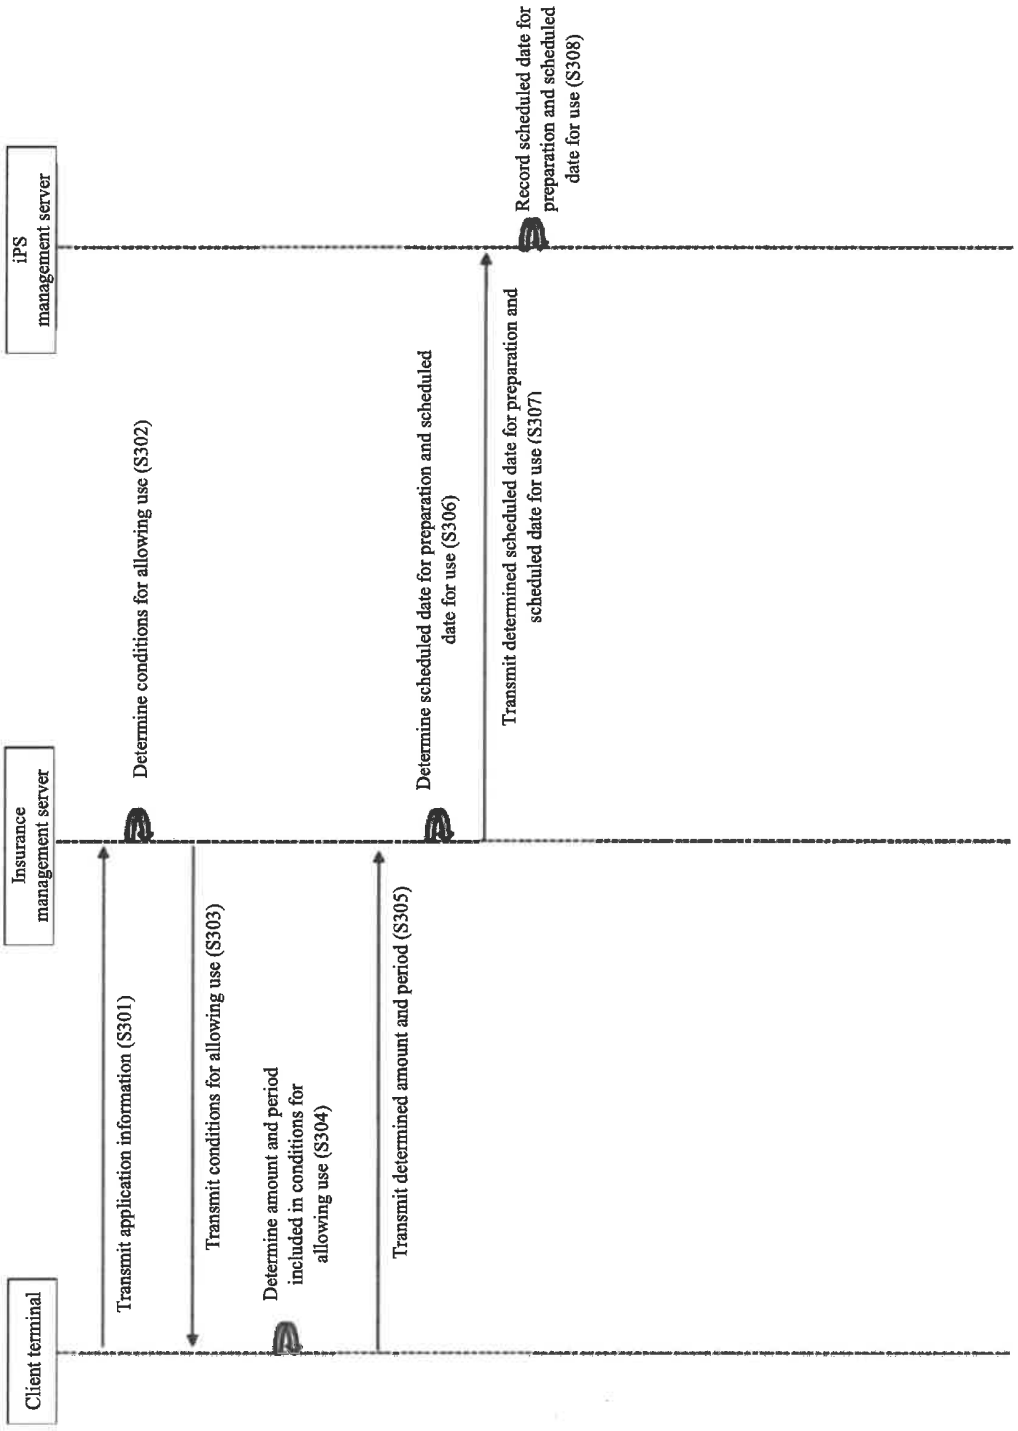

Client terminal
Insurance management server
iPS management server
Transmit application information (S301)
Determine conditions for allowing use (S302)
Transmit conditions for allowing use (S303)
Determine amount and period included in conditions for allowing use (S304)
Transmit determined amount and period (S305)
Determine scheduled date for preparation and scheduled date for use (S306)
Transmit determined scheduled date for preparation and scheduled date for use (S307)
Record scheduled date for preparation and scheduled date for use (S308)

FIG. 5

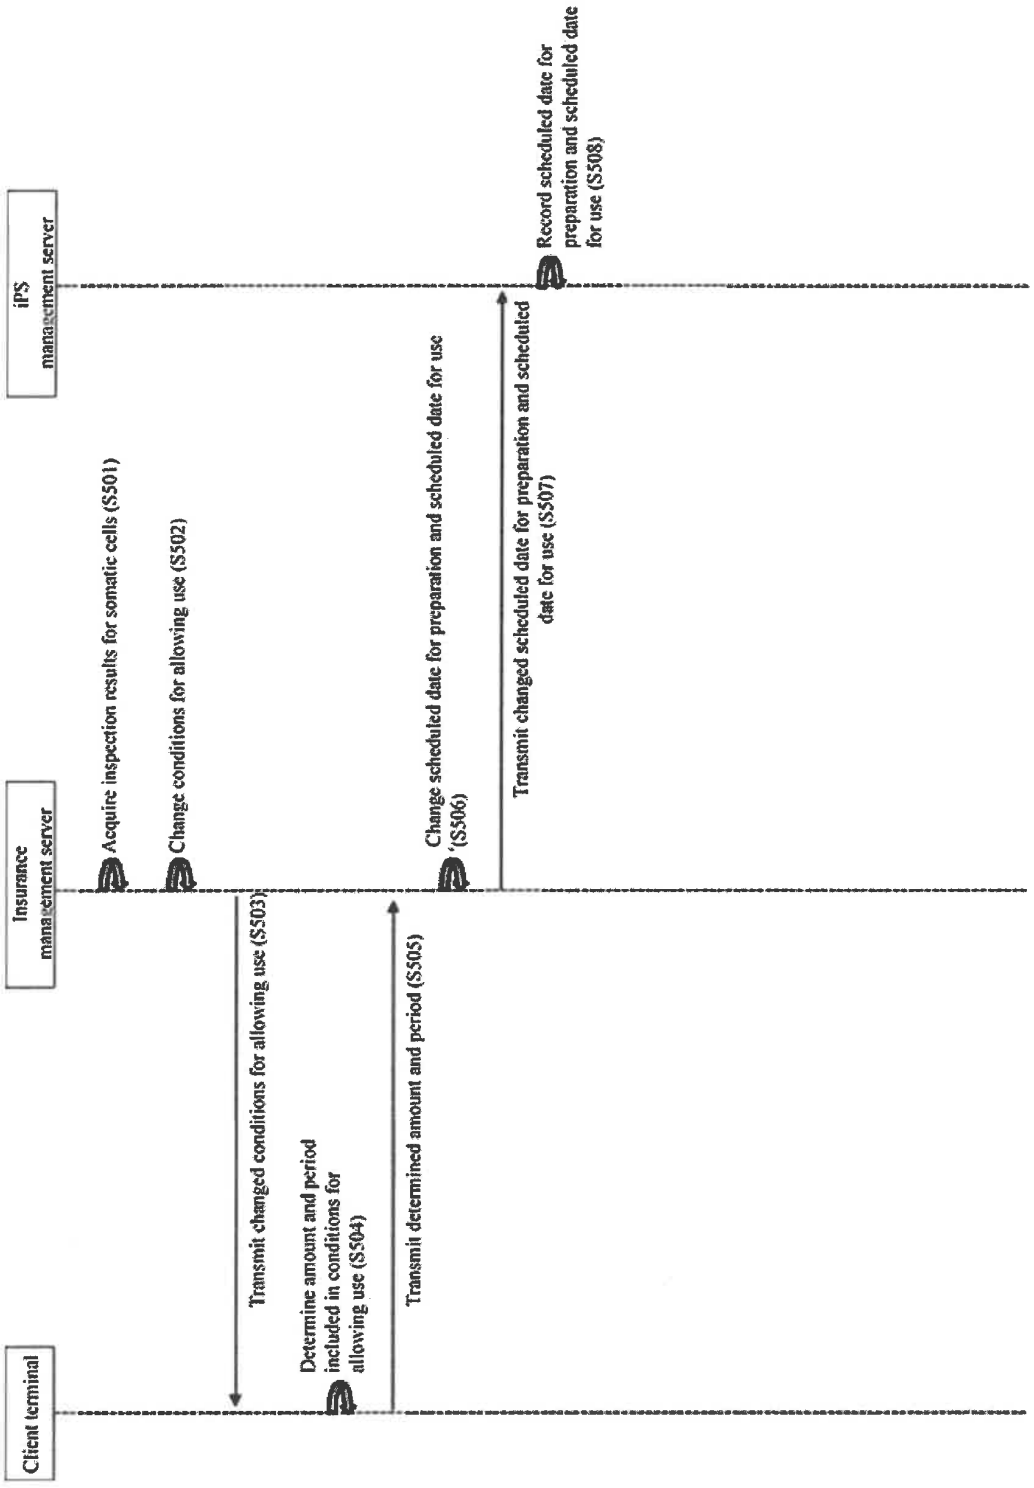

Client terminal
Insurance management server
iPS management server
Acquire inspection results for somatic cells (S501)
Change conditions for allowing use (S502)
Transmit changed conditions for allowing use (S503)
Determine amount and period included in conditions for allowing use (S504)
Transmit determined amount and period (S505)
Change scheduled date for preparation and scheduled date for use (S506)
Transmit changed scheduled date for preparation and scheduled date for use (S507)
Record scheduled date for preparation and scheduled date for use (S508)

FIG. 7

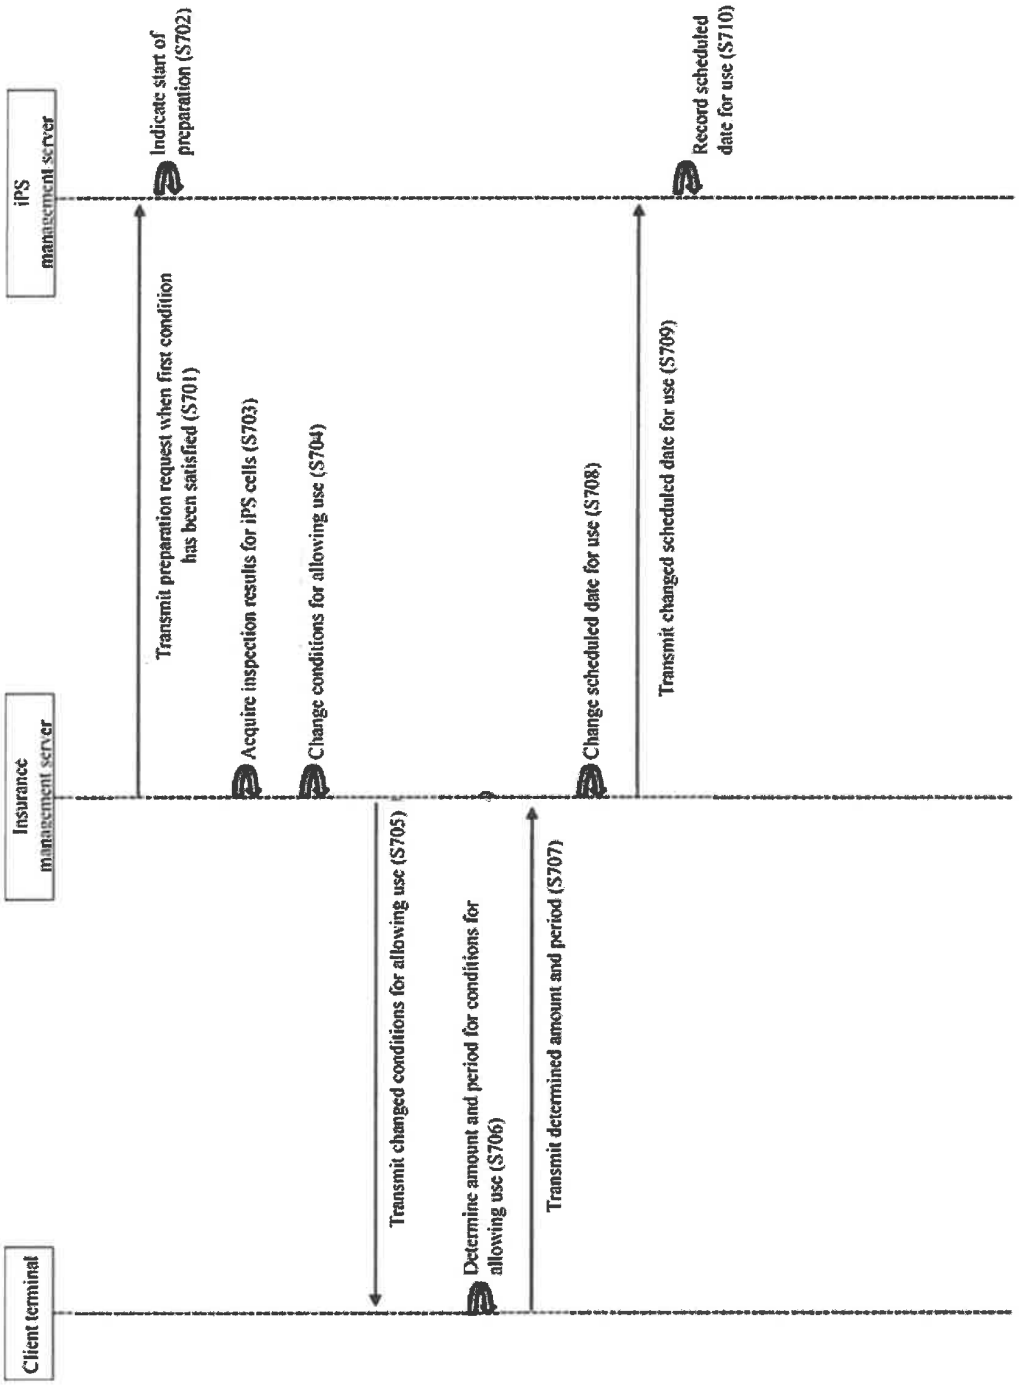

iPS management server
Insurance management server
Client terminal
Indicate start of preparation (S702)
Record scheduled date for use (S710)
Transmit preparation request when first condition has been satisfied (S701)
Acquire inspection results for iPS cells (S703)
Change conditions for allowing use (S704)
Change scheduled date for use (S708)
Transmit changed scheduled date for use (S709)
Transmit changed conditions for allowing use (S705)
Determine amount and period for conditions for allowing use (S706)
Transmit determined amount and period (S707)

FIG. 11

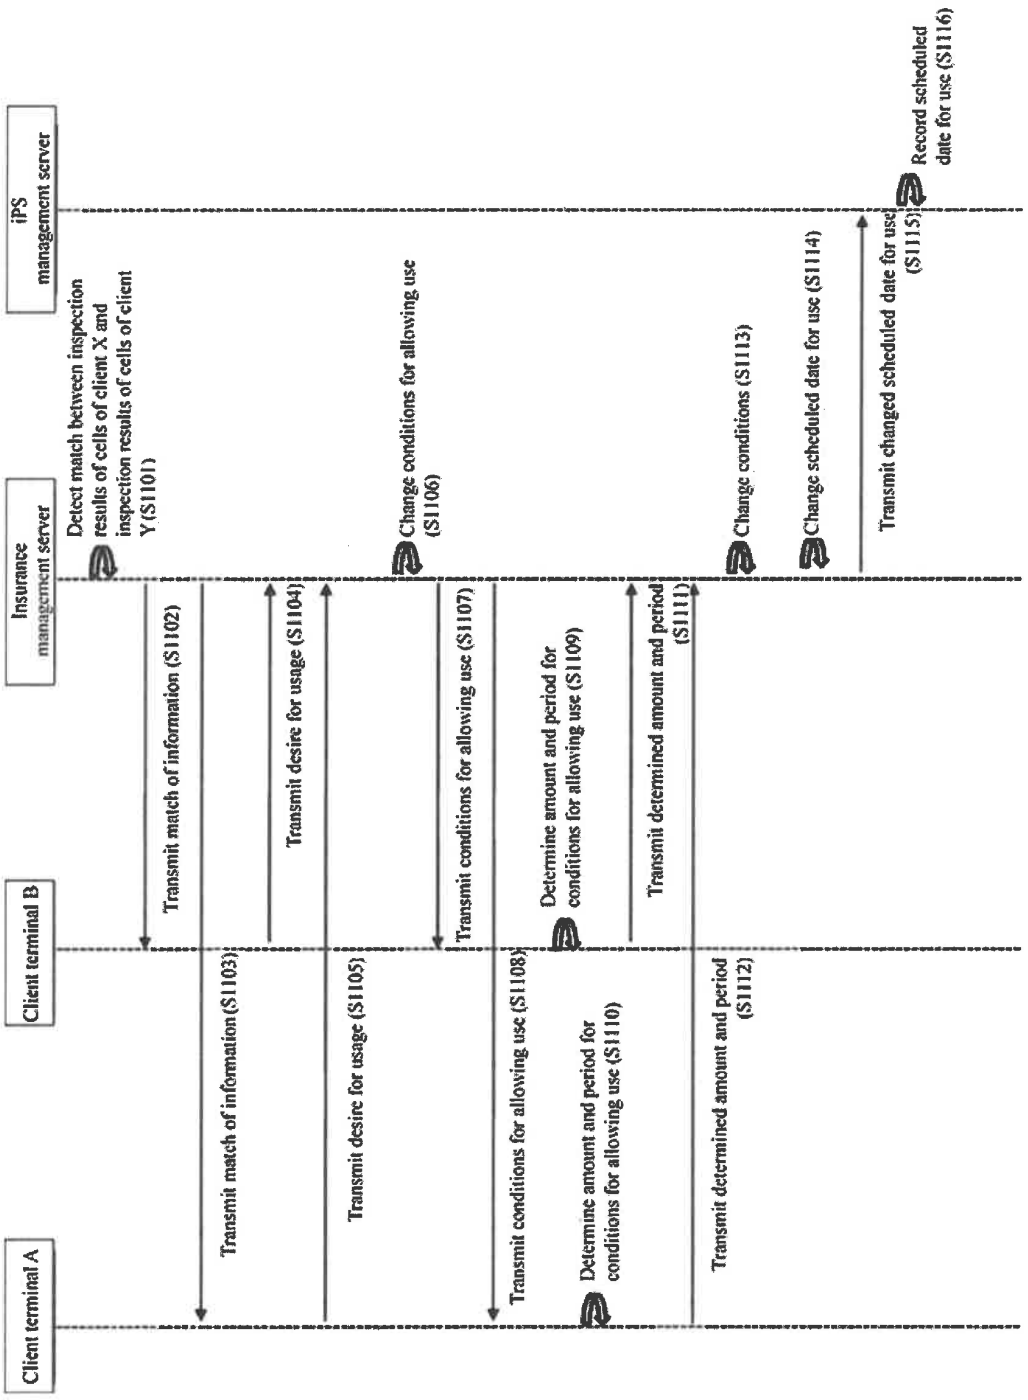

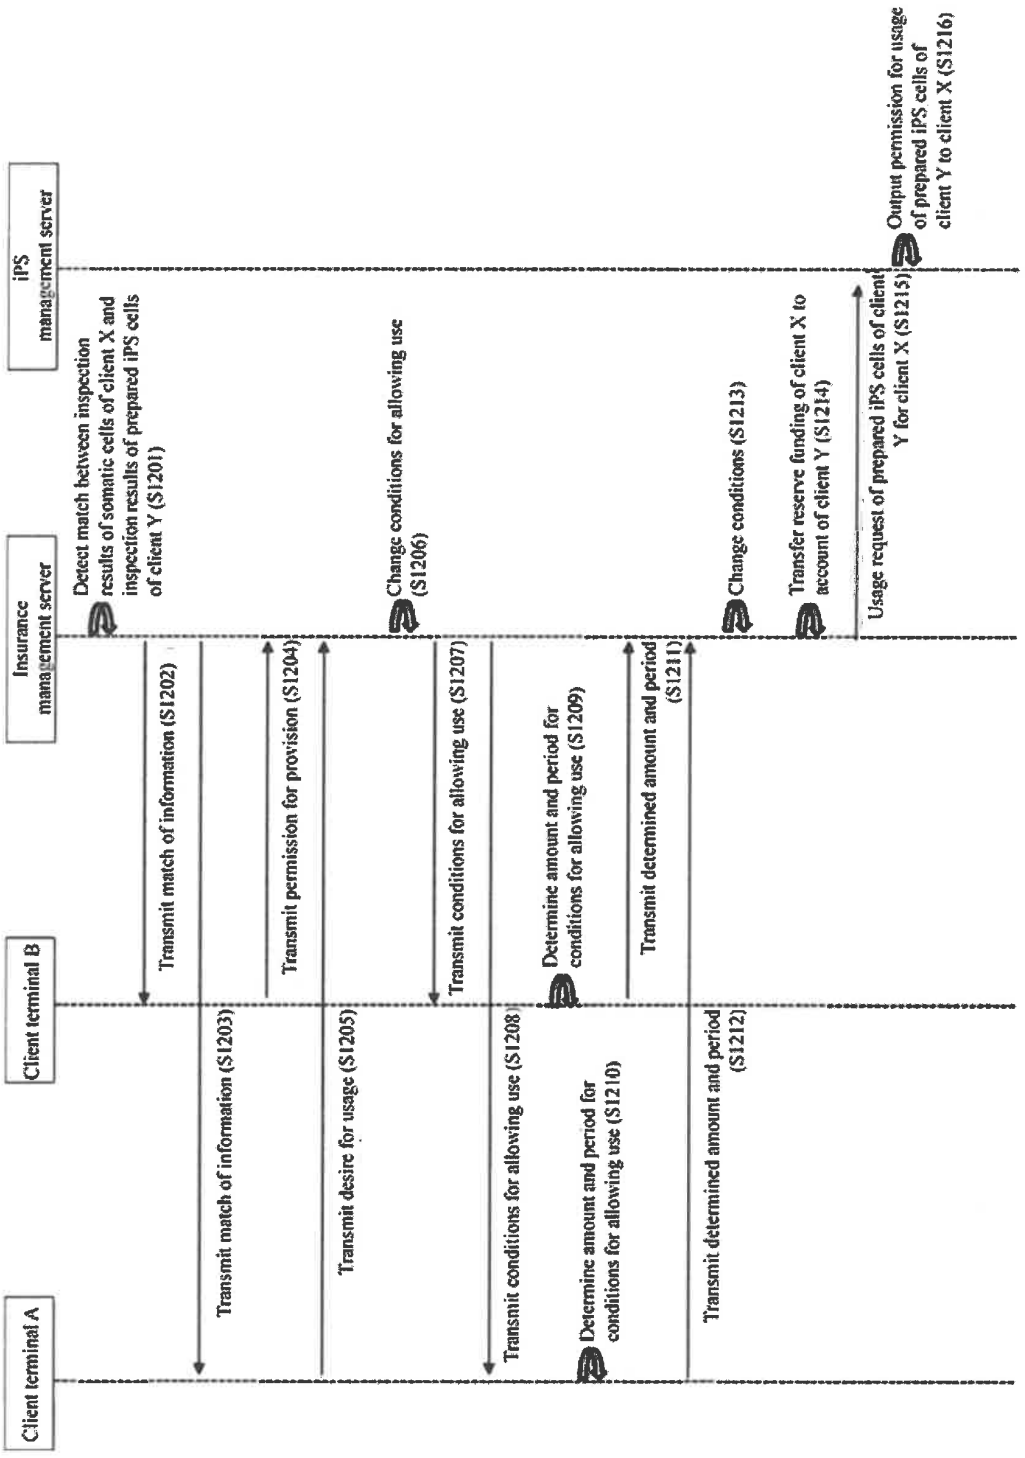

Client terminal A
Client terminal B
Insurance management server
iPS management server
Detect match between inspection results of cells of client X and inspection results of cells of client Y (S1101)
Transmit match of information (S1102)
Transmit match of information (S1103)
Transmit desire for usage (S1104)
Transmit desire for usage (S1105)
Change conditions for allowing use (S1106)
Transmit conditions for allowing use (S1107)
Transmit conditions for allowing use (S1108)
Determine amount and period for conditions for allowing use (S1109)
Determine amount and period for conditions for allowing use (S1110)
Transmit determined amount and period (S1111)
Transmit determined amount and period (S1112)
Change conditions (S1113)
Change scheduled date for use (S1114)
Transmit changed scheduled date for use (S1115)
Record scheduled date for use (S1116)

FIG. 12

Client terminal A
Client terminal B
Insurance management server
iPS management server
Detect match between inspection results of somatic cells of client X and inspection results of prepared iPS cells of client Y (S1201)
Transmit match of information (S1202)
Transmit match of information (S1203)
Transmit permission for provision (S1204)
Transmit desire for usage (S1205)
Change conditions for allowing use (S1206)
Transmit conditions for allowing use (S1207)
Transmit conditions for allowing use (S1208)
Determine amount and period for conditions for allowing use (S1209)
Determine amount and period for conditions for allowing use (S1210)
Transmit determined amount and period (S1211)
Transmit determined amount and period (S1212)
Change conditions (S1213)
Transfer reserve funding of client X to account of client Y (S1214)
Usage request of prepared iPS cells of client Y for client X (S1215)
Output permission for usage of prepared iPS cells of client Y to client X (S1216)
