(54) Title: REFRIGERATED CABINET

(57) Abstract: A refrigerated cabinet (11) comprising storage space having a front opening through which access is gained to the space, the space including a zone subdivided into at least one compartment (15), each compartment (15) defined by a drawer (31), each drawer (31) being moveable from a retracted position at which it is accommodated within the zone and an extended position at which it extends forwardly from the space, wherein when the drawer (31) is in the retracted position the compartment is connected to a cooling means (23) and when the drawer is in the extended position the interior of the compartment is accessible from an upper portion of the drawer (31) and the drawer (31) is isolated from the cooling means (23), the isolation means being associated with the cabinet (11) to sealingly isolate the cooling means (23) from the compartment (15) when the drawer (31) is not in the retracted position.
