

## ABSTRACT

An object of the present invention is to provide eel-like food using no animal-derived raw materials excellent in texture and flavor like those of eel. By including a meat  
5 layer containing a textured vegetable protein, starch, methylcellulose, an isolated soy protein powder, and a fat or oil, an intermediate layer containing a fat or oil, and gelled with a thickener containing xanthan gum and HA gellan gum, and a skin layer obtained by gelling sodium alginate with a calcium salt, or gelling methylcellulose, eel-like food using no animal-derived raw materials excellent in texture and flavor like those of eel can be provided.
