ABSTRACT

A reel seat for fixing a fishing reel includes a tubular reel seat main body, a floating hood, and an operation knob. The tubular reel seat main body includes a fixing hood and a hollow portion into which a rod is inserted. The floating hood is movable in an axial direction with respect to the reel seat main body. The operation knob rotates in a peripheral direction to move the floating hood in the axial direction. A finger hooking recess on which a finger of a user is disposed is provided in an upper portion on a front side of the floating hood.
