(54) **Title:** VERTICAL-TYPE ELECTRIC CONTACTOR AND MANUFACTURE METHOD THEREOF

(57) **Abstract:** A vertical-type electric contactor connected to a bump of an electric contactor is provided. The vertical-type electric contactor includes a support beam, vertically bonded with the bump, in which at least two elastic parts are spaced apart from each other; a fixed part disposed at the bottom end of the support beam for fixing the support beam; and a tip part disposed at the bottom end of the fixed part, the tip part and the fixed part being a single body. According to the vertical-type electric contactor, a reaction force generated at a tip part is effectively distributed to test electric devices without damage of the vertical-type electric contactor.
