(54) Title: MEDIA TIMELINE SORTING

(57) Abstract: Media timeline sorting is described. In an implementation, a method includes receiving a media timeline at an application programming interface (2202), in which the media timeline includes a plurality of timeline objects. One or more of the timeline objects reference a respective one of a plurality of media. A plurality of segments is generated from the media timeline for sequential rendering (2712) such that each segment references a particular set of the timeline objects that are rendering during a duration of the segment.

Declarations under Rule 4.17:

— *as to applicant's entitlement to apply for and be granted a patent (Rule 4.17(ii))*

— *as to the applicant's entitlement to claim the priority of the earlier application (Rule 4.17(iii))*

Published:

— *with international search report*

— *before the expiration of the time limit for amending the claims and to be republished in the event of receipt of amendments*

(88) Date of publication of the international search report:
2 August 2007
