ABSTRACT

REFRIGERATING APPARATUS

An outside air temperature sensor **(231)** for detecting the temperature of outside air, and a control means **(240)** for controlling the operating capacity of a supercool compressor **(221)** are provided. The control means **(240)** controls the operation of the supercool compressor **(221)** based on the state of refrigerant of a refrigerant circuit **(20)** flowing through a supercool heat exchanger **(210)** and the temperature of outside air detected by the outside air temperature sensor **(231)**.
