STAPLED PEPTIDES AND METHODS THEREOF

ABSTRACT

Among other things, the present disclosure provides various useful agents. In some embodiments, provided agents can bind to beta-catenin. In some embodiments, the present disclosure provides technologies for modulating beta-catenin functions. In some embodiments, the present disclosure provides technologies for preventing and/or treating conditions, disorders or diseases associated with beta-catenin. In some embodiments, the present disclosure provides designed amino acids and agents which can provide improved properties and/or activities.
