

**METHOD OF PRODUCING RESONANT PATTERNS ADAPTED TO THE IMPLEMENTATION OF
RF PASSIVE FUNCTIONS**

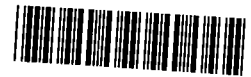

ABSTRACT

- 5 Method for producing one or more radio-frequency resonant patterns (10) on a printed circuit (11) characterized in that it includes a step of cutting one or more resonant patterns (10) directly into the printed circuit (11) whilst preserving means (13) for mechanically securing the resonant patterns to said printed circuit (11).
