(54) Title: ATTACHABLE DEVICE SUPPORT WITH A COMMUNICATION MEANS

(57) Abstract: The application provides an attachable support for attachment to a bottom surface of an equipment. The attachable support, which has a height of at least 1 cm, comprises a casing for supporting a weight of the equipment. The casing comprises an attachment portion for securing the attachable support to the bottom surface of the equipment, a first casing portion, and a second casing portion. The first casing portion and the second casing portion form a compartment of the casing, which is located below the attachment portion. The compartment houses an electric circuit and a communication means which is connected to the electric circuit. The electric circuit provides a cooperation with the equipment.
