(54) Title: INSERTION TOOL

(57) Abstract

An insertion tool for insertion of a ring into a body defining an internal recess for receiving the ring including a ring holder and a plunger. The ring holder (12) includes a ring end (20) and handle end (22). The ring end includes a stationary shoulder (24) for engaging the body. The ring end includes at least one relief (38) for receiving and positioning the ring. The ring holder defines a plunger channel (44) extending between the ring and the handle ends. The plunger (14) is slidingly positioned in the plunger channel. The plunger has a radius end (60) adjacent the ring end and an actuation end (62) adjacent the handle end. The radius end includes at least one radius for engaging the ring.
