

[ABSTRACT]

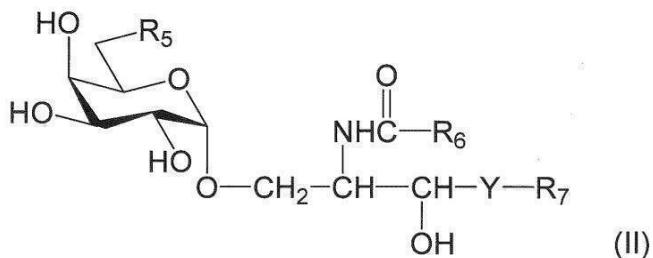

The present invention aims to provide an NKT cell ligand-containing preparation that can artificially activate NKT cells in a living body and is useful as an anti-malignant tumor agent
5 and the like.

A liposome composition containing a glycolipid selected from the group consisting of a compound represented by the formula (I), a compound represented by the formula (II), and salts thereof:

10 the formula (I):

wherein each symbol is as defined in the specification,
the formula (II):

15 wherein each symbol is as defined in the DESCRIPTION.

[No suitable figure]
