(54) Title: SPACE RADIATION SHIELDING ENCLOSURE FOR ELECTRONICS

(57) Abstract: The invention relates to radiation shielding, shield suited therefore, and enclosures related thereto and method for (co-)designing and related material search methods. The invention also relates to enclosures, provided with such radiation shielding shields. In particular the invention relates to enclosures for protecting electronic devices (EEE components, (high-performance) computing devices) against such radiation. The invention also relates to enclosures for protecting humans for such radiation. The invention also relates to enclosure, sized to contain both electronic devices and humans. The invention also relates to arrangements wherein one enclosure (containing electronics) is part of a second (bigger) enclosure (wherein also one or more humans or users can fit, who may operate the electronics).
