

CARD AND CARD PRODUCTION METHOD

ABSTRACT

5 To provide a card capable of improving external appearance, and
a card production method. A card (1) is provided with: a
module substrate (30); a lower layer (10) and an upper layer
(50) arranged above and below the module substrate (30), the
layers having an outline larger than the outline of the module
10 substrate (30); and thickness adjustment layers (11, 51) for
adjusting the thickness in a substrate outward region (S1), the
thickness adjustment layers being provided between the lower
layer (10) and the upper layer (50) and to the substrate
outward region (S1) further outward than the outline of the
15 module substrate (30), and being provided by printing to at
least one layer among the layers that form the card (1).
