## Abstract

Provided is a cosmetic for protection against ultraviolet radiation which is excellent in the preservation stability, high in the ultraviolet protection effect, and exhibits no stickiness and a good feeling of use and no feeling of skin irritation. The cosmetic for protection against ultraviolet radiation comprises the following components (A), (B), (C), (D) and (E): (A) 0.18 to 2 mass% of an ionic surfactant; (B) 1 to 10 mass% of a hydrophobic amphipathic substance; (C) 1 to 40 mass% of a liquid oil agent comprising an oil-soluble ultraviolet absorber; (D) 0.01 to 6 mass% of a solid oil agent; and (E) water, wherein the cosmetic is obtained by a method comprising the following steps: an emulsification step of mixing a composition comprising the components (A) to (D) with (E) water under heating to form an emulsion; and a cooling step of cooling the emulsion formed in the emulsification step at a cooling rate of 0.5 to 5°C/sec.
