(54) Title: MIXING DEVICE FOR FROTHING BEVERAGES

FIG. 1

(57) Abstract: The invention concerns a mixing device (1) comprising : - a whisker housing (2), a rotor (3) and a back wall (4), the whisker housing and the back wall forming a whisker chamber in which is lodged the rotor, - the whisker housing comprising a beverage inlet (11) and a beverage outlet (7), - a drive shaft (41) for driving the rotor, said drive shaft being supported by the back wall, - the rotor presenting a radial back surface (33) facing the whisker housing back wall (4) and a radial front surface (32) opposed to the radial back surface - the whisker housing comprising a front wall (21), said front wall facing at least a part of the radial front surface (32) of the rotor, and wherein the whisker housing front wall (21) presents bumps (5) elevating from the surface (211) of the front wall, the upper surface (51) of each bump being flat and the edges (52) of said upper surface being sharp.
