ABSTRACT

A copolymer of ethylene with an alkenyl aromatic hydrocarbon having a content of the alkenyl aromatic hydrocarbon in the copolymer of 0.2 to 60 mol% and a ratio (②/③) of the area of a peak ② appearing at 34.0 to 36.0ppm to the area of a peak ③ appearing at 36.0 to 38.0ppm in a ^{13}C-NMR spectrum of the copolymer of 0.01 to 0.35, and a molded article comprising the copolymer.
