(54) Title: 5-HETEROARYL SUBSTITUTED INDOLES

(57) Abstract: The present invention relates 5-heteroaryl substituted indoles having high affinity for α_1-adrenoceptors. Accordingly, the compounds of the invention are considered useful for the treatment of diseases or disorders responsive to α_1-adrenoceptor antagonists. Further, as some of the compounds are selective α_1-adrenoceptor ligands they may be particularly useful as PET or SPECT ligands.
