(54) **Title:** METHOD AND APPARATUS FOR SWITCHING GLOBAL SPECIAL EFFECTS, TERMINAL DEVICE, AND STORAGE MEDIUM

(54) 发明名称: 切换全局特效的方法、装置、终端设备及存储介质

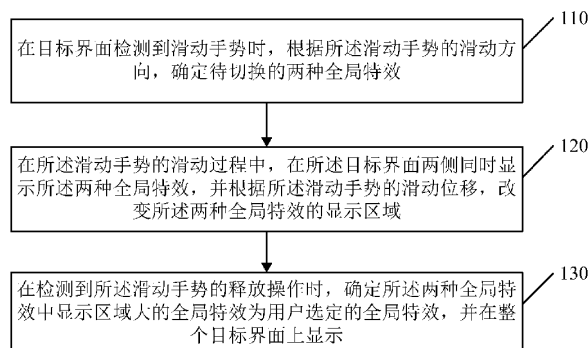

图 1

- 110 Determine, upon detecting a sliding gesture in a target interface, two global special effects to be switched according to the sliding direction of the sliding gesture
- 120 During a sliding process of the sliding gesture, simultaneously display the two global special effects on both sides of the target interface, and change the display areas of the two global special effects according to the sliding displacement of the sliding gesture
- 130 Determine, upon detecting a release operation of the sliding gesture, the global special effect having a larger display area in the two global special effects as the global special effect selected by a user, and display said global special effect on the entire target interface

(57) **Abstract:** Disclosed are a method and apparatus for switching global special effects, a terminal device, and a storage medium. The method comprises: determining, upon detecting a sliding gesture in a target interface, two global special effects to be switched according to the sliding direction of the sliding gesture; during a sliding process of the sliding gesture, simultaneously displaying the two global special effects on both sides of the target interface, and changing the display areas of the two global special effects according to the sliding displacement of the sliding gesture; and determining, upon detecting a release operation of the sliding gesture, the global

special effect having a larger display area in the two global special effects as the global special effect selected by a user, and displaying said global special effect on the entire target interface.

(57) 摘要: 公开了一种切换全局特效的方法、装置、终端设备及存储介质。该方法包括: 响应于目标界面检测到滑动手势, 根据所述滑动手势的滑动方向, 确定待切换的两种全局特效; 在所述滑动手势的滑动过程中, 在所述目标界面两侧同时显示所述两种全局特效, 并根据所述滑动手势的滑动位移, 改变所述两种全局特效的显示区域; 响应于检测到所述滑动手势的释放操作, 确定所述两种全局特效中显示区域大的全局特效为用户确定的全局特效, 并在整个目标界面上显示。
