(54) **Title:** GAMING APPARATUS AND METHOD

FIG. 4

(57) **Abstract:** One embodiment relates to a gaming apparatus. The gaming apparatus includes an electronic display and a circuit configured to control the electronic display and to cause the electronic display to display a graphical scene. The graphical scene includes a first portion having a first video corresponding to a first body portion of one of a number of characters, a second portion having a second video corresponding to a second body portion of one of the number of characters, and a third portion having a third video corresponding to a third body portion of one of the number of characters.
