(54) Title: SYSTEM AND METHOD FOR CHECKING DIGITAL CERTIFICATE STATUS

(57) Abstract: A method and system for handling digital certificate status checks are provided. Digital certificate status request data transmitted from a client system is received at a proxy system. The proxy system generates query data for the digital certificate status in response to receiving the digital certificate status request data. The query data is transmitted to a status provider system, and status data from the status provider system in response to the query data is received at the proxy system. Digital certificate status data based on the status data received is generated by the proxy system and transmitted to the client system.
