CLAIMS

1. A composition for ameliorating hypoalbuminemia containing a branched-chain amino acid as an active ingredient, wherein the composition contains leucine and/or isoleucine and does not contain valine as an active ingredient.

2. The composition for ameliorating hypoalbuminemia according to claim 1, wherein the composition contains leucine and isoleucine as the branched-chain amino acid.

3. The composition for ameliorating hypoalbuminemia according to claim 2, wherein a mass ratio of the leucine to the isoleucine is from 0.1 to 10.

4. The composition for ameliorating hypoalbuminemia according to claim 1, wherein the composition contains either leucine or isoleucine alone as the branched-chain amino acid.

5. The composition for ameliorating hypoalbuminemia according to claim 1, in a form of infusion formulation.

6. The composition for ameliorating hypoalbuminemia according to claim 1, in a form of oral formulation.

7. The composition for ameliorating hypoalbuminemia according to claim 1, in a form of food or drink.

Claims

[Claim 1]

A formulation for ameliorating hypoalbuminemia, which contains leucine and isoleucine and does not contain valine as an active ingredient.

[Claim 2]

The formulation for ameliorating hypoalbuminemia according to claim 1, wherein a mass ratio of the leucine to the isoleucine is from 0.1 to 10.

[Claim 3]

The formulation for ameliorating hypoalbuminemia according to claim 1, in a form of infusion formulation.

[Claim 4]

The formulation for ameliorating hypoalbuminemia according to claim 1, in a form of oral formulation.
