

ABSTRACT

The present disclosure relates to the technical field of terminals, and particularly relates to a method and apparatus for displaying image-text content, and a storage medium and a computer program product. The method for displaying image-text content comprises: displaying image-text content in a feed, wherein the image-text content comprises a picture and thumbnail text; receiving an operation of a user for the picture in the image-text content; and in response to a specified operation of the user for the picture in the image-text content, displaying a details page of the image-text content, wherein the details page comprises the picture and complete text.
