

CAP

ABSTRACT

Issue: Making available a cap that can improve the wearer's physical functioning as well as flexibility.

Resolution Means: A cap 100 of the present invention comprises a cap body element 10 for covering an area of the head, and in the cap body element 10 a head-area patterned piece 20 extending along a centerline (C) of the head area. The head-area patterned piece 20 is constituted from a tape medium 21 adhered to at least one of either the reverse surface or the obverse surface of the cap body element 10. A mineral(s) (30) is then contained in the tape medium 21 in the head-area patterned piece 20.
