(54) Title: APPARATUS AND METHOD FOR PROCESSING ELECTRONIC COMPONENTS

(57) Abstract: The invention relates to an apparatus for processing electronic components, such as semi-conductor products, comprising at least two processing stations, at least one supply/discharge position for electronic components, a robot arm with engaging means for engaging the electronic components for displacing electronic components between the supply/discharge position and the processing stations, and a control for actuating the robot arm and the processing stations. The invention also relates to an assembly of at least two such apparatuses and to a method for processing electronic components which can be performed by means of the apparatus according to the invention.
