(54) **Title:** DUAL SIDED RAZOR

Figure 1

(57) **Abstract:** A dual sided disposable razor and system razor is provided having arms supporting a cartridge. The dual sided disposable razor and system razor comprise a handle extending vertically with a first side and a second side. The second side has a profile symmetric to the first side. The dual sided razor also has a first pivot extending horizontally from a first arm and a second pivot extending horizontally from a second arm, and the cartridge is configured to be rotated about the first pivot and the second pivot to switch between a first side of the cartridge or a second side of the cartridge to bias the cartridge to either the first side or to the second side. This facilitates user to switch between sides without having to detach the cartridge.
