IC MOUNTING/DEMOUNTING SYSTEM
AND A MOUNTING/DEMOUNTING HEAD THEREFOR

The IC mounting/demounting system of the present invention makes it possible to adjust the interval between socket pushers 42 and 43 of mounting/demounting head 25 in accordance with the size of IC socket 1A. Therefore, it is unnecessary to replace mounting/demounting head 25 when changing types of IC's and therefore, the operation efficiency is greatly improved.
