(54) Title: A SYSTEM OF AGGREGATING SERVERS

Fig. 5

(57) **Abstract:** A system of aggregating servers (100, 200) is described, with a first aggregating server (100), configured to establish a session for communicatively linking with at least one first system to be aggregated (50, 60, 70, 80); at least a second aggregating server (200), configured to establish a session communicatively linking with at least one second system to be aggregated (50, 60, 70, 80); wherein the first aggregating server (100) and the second aggregating server (200) are configured to: replicate mutually structured data provided by the first system to be aggregated (50, 60, 70, 80) and/or the second system to be aggregated (50, 60, 70, 80), to provide access to the structured data (110, 120, 130, 140) of the respective systems to be aggregated (50, 60, 70, 80) for the first aggregating server (100) and the second aggregating server (200); and coordinate the respective sessions of the system of aggregating servers with the at least first system to be aggregated (50, 60, 70, 80) and/or the at least second system to be aggregated (50, 60, 70, 80), to prevent improper access to the at least first system to be aggregated (50, 60, 70, 80) and/or the at least second system to be aggregated (50, 60, 70, 80).
