- S101 In response to having received data, determine whether the data belongs to a current monitoring data interval
- S102 When the data does not belong to the current monitoring data interval, determine whether there is an abnormal data interval matching the data, and when there is an abnormal data interval matching the data, update the abnormal data interval according to the data
- S103 When the abnormal data interval satisfies a first preset condition, determine the abnormal data interval as a current monitoring data interval

(57) Abstract: Disclosed in the embodiments of the present invention are a data monitoring method and device, an electronic device, and a computer readable storage medium, said method comprising: in response to having received data, determining whether the data belongs to a current monitoring data interval; when the data does not belong to the current monitoring data interval, determining whether there is an abnormal data interval matching the data, and when there is an abnormal data interval matching the data, updating the abnormal data interval according to the data; and when the abnormal data interval satisfies a first preset condition, determining the

abnormal data interval as a current monitoring data interval. The technical solution can avoid erroneous determination for normal data fluctuation having a relatively large range, achieving the purpose of accurately monitoring data.

(57) 摘要: 本发明实施例公开了一种数据监控方法、装置、电子设备及计算机可读存储介质, 所述方法包括: 响应于接收到数据, 确定所述数据是否属于当前监控数据区间; 当所述数据不属于所述当前监控数据区间时, 确定是否存在与所述数据匹配的异常数据区间, 当存在与所述数据匹配的异常数据区间时, 根据所述数据对所述异常数据区间进行更新; 当所述异常数据区间满足第一预设条件时, 将所述异常数据区间确定为当前监控数据区间。该技术方案能够避免对于正常的、但幅度较大的数据波动出现误判的情况, 进而实现准确监控数据的目的。
