(54) Title: SURFACE STABILISER AND USES THEREOF

Figure 3

(57) Abstract: The invention described herein relates to a system for stabilizing soil materials. In particular, the invention is directed to a system for stabilizing or bonding soil for road or pavement constructions, thereby providing improved vehicular access, although the scope of the invention is not necessarily limited to the above. Other materials the invention can be used to stabilise or bond include minerals, rocks, aggregates and biogenic substances. The invention can also be utilized for pothole repairs or suppression of dust particles, or crack sealing or sealing of pavements, prime, sand, single or two coat or asphalt.
