(54) Title: ROAD MARKING

Fig. 1

(57) Abstract: The present invention relates to a road marking comprising a profile comprising a luminescent component, which is to be installed in the road surface, in which profile one or more light sources are present and the aforesaid luminescent component is located above said one or more light sources. The profile is made of an elastic material, wherein the part of the profile present at the surface of the road surface is translucent.
