

ABSTRACT

BACTERIUM DEGRADING MICROORGANISM, MICROBIAL PREPARATION, AND METHOD AND DEVICE FOR DEGRADING MICROORGANISM

5

Provided are a bacterium having a 16S rRNA gene comprising a nucleotide sequence having 98.2% or more identity to the nucleotide sequence represented by SEQ ID NO: 1, and having an ability to degrade a target microorganism, a microbial preparation for degrading a target microorganism, comprising a bacterium (a1), and a method for degrading a target microorganism and a device for degrading a target microorganism using the same. Bacterium (a1) is a bacterium having a 16S rRNA gene comprising a nucleotide sequence having 90% or more identity to the nucleotide sequence represented by SEQ ID NO: 1, and having an ability to degrade a target microorganism.
